The Fortieth Annual Conference on Neural Information Processing Systems

NeurIPS 2026

 Sydney, Australia  Dec 06 2026  <https://neurips.cc/> (<https://neurips.cc/>)
 pc2026@neurips.cc (<mailto:pc2026@neurips.cc>)

Please see the venue website for more information.

Submission Start: Apr 15 2026 12:00PM UTC-0, Abstract Registration: May 05 2026 11:59AM UTC-0,

Submission Deadline: May 07 2026 11:59AM UTC-0

Add: **NeurIPS 2026 Conference Submission**

* denotes a required field

Title *

Title of paper. Add TeX formulas using the following formats: $\text{\$In-line Formula\$}$ or $\text{\$\$Block Formula\$\$}$.

Authors *

Search author profile by name or profile ID. All authors must have an OpenReview profile prior to submitting a paper.

Paul Carver Tiffany III (/profile?id=~Paul_Carver_Tiffany_III1) ✕

TL;DR

"Too Long; Didn't Read": a short sentence describing your paper

Abstract *

Abstract of paper. Add TeX formulas using the following formats: $\text{\$In-line Formula\$}$ or $\text{\$\$Block Formula\$\$}$.

 TeX is supported (<https://docs.openreview.net/reference/openreview-tex>)

PDF

Upload your submission as a PDF file that ends with .pdf. In this file the main text (max. 9 pages), references, optional technical appendices, and the paper checklist should be included. There's no page limit for references, appendices and the paper checklist. The file size limit is 50MB. The paper PDF can be updated until the full paper submission deadline.

Choose PDF

Checklist Confirmation *

In order to improve the rigor and transparency of research submitted to and published at NeurIPS, authors are required to complete a paper checklist and include it in the paper PDF. See <https://neurips.cc/public/guides/PaperChecklist> (<https://neurips.cc/public/guides/PaperChecklist>) and the provided 2026 sample LaTeX file. **Papers not including the checklist in the paper PDF will be desk rejected.**

☐ I confirm that I have included a paper checklist in the paper PDF.

Supplementary Material

Please include any supplementary material not contained in the paper PDF (e.g., code or data), which should be self-contained and zipped into a single file. Written appendices should NOT be included in the supplementary material; they should be submitted as part of the main paper PDF. Note that supplementary material will be visible to reviewers throughout and after the review period. Therefore, ensure all material is anonymized. The maximum file size is 100MB. Supplementary material can be updated until the full paper deadline (there is no additional deadline for the supplementary material).

Choose Supplementary Material

Financial Support

Optionally indicate one student author on the paper who would need financial support to attend and present at the conference if the paper is accepted (or leave blank if financial support is not needed). Please enter an OpenReview ID (e.g., ~First_Last1) that exactly matches one of the authors.

 Visible only to: NeurIPS 2026 Conference NeurIPS 2026 Conference Submission *number* Authors

Reviewer Nomination *

Nominate at least one author who is a qualified reviewer - i.e., at least 2 first-author OR at least 5 co-authored publications that are at peer-reviewed archival related venues (e.g., NeurIPS, ICLR, ICML, CVPR, ICCV/ECCV, ACL, EMNLP, WACV, COLM, CoLLAs, RLC, AISTATS, KDD, IJCAI, AAAI, UAI, COLT, CHIL, MLHC, TMLR, JMLR, FAccT, CHI, Nature Machine Intelligence - not an exhaustive list and workshop papers do not count). Being named as such a reviewer in the submission constitutes an acceptance and a commitment to carry out the regular reviewing load (approx. 4 papers) responsibly if asked by the PC chairs or the E&D track chairs. Only if no qualified reviewer exists in the author list, nominate the best-qualified author for consideration by the PC chairs or the E&D track chairs. In addition, note that any author listed on 4 or more papers will be automatically signed up as a reviewer unless they are already serving as a reviewer, AC, SAC, or other roles in the Organization Committee. Failure to assign a qualified reviewer when one is available in the author list may result in desk rejection. Please enter an OpenReview ID (e.g., ~First_Last1) that exactly matches one of the authors (separate by comma for more than one nominations).

👁 Visible only to: NeurIPS 2026 Conference NeurIPS 2026 Conference Submission *number* Authors

Responsible Reviewing *

We acknowledge that every author on the program committee is obliged to conduct responsible ACing / reviewing according to the policy designed by the PC Chairs and relevant members of the organizing committee. **Failure to do so may result in desk rejection or other serious consequences.**

☐ We acknowledge the responsible reviewing obligations as authors.

Primary Area *

Please indicate the primary subject areas (you can choose more than 1) that best describe the paper. This will be used for reviewer matching and submission statistics.

Secondary Area *

Please indicate the secondary subject areas that best describe the paper. These will be used for reviewer matching and submission statistics.

Contribution Type *

Specify the general type of the paper's contribution. For guidance, see:
<https://blog.neurips.cc/2026/04/16/a-choice-of-contribution-types-at-neurips-2026/>
(<https://blog.neurips.cc/2026/04/16/a-choice-of-contribution-types-at-neurips-2026/>)

Academic Integrity *

See the NeurIPS Code of Conduct (<https://neurips.cc/public/CodeOfConduct>) and the NeurIPS policy of Academic Integrity in Research Paper Submissions and Reviews (<https://neurips.cc/Conferences/2026/ReviewerIntegrity>)

- ☐ I acknowledge that I have read the NeurIPS Handbook and commit to adhering to all policies in the Handbook (<https://neurips.cc/Conferences/2026/MainTrackHandbook>), the NeurIPS Code of Conduct and the NeurIPS Academic Integrity Policy.

LLM Usage*

This checklist collects statistical information on how NeurIPS authors use Generative AI (e.g., LLMs) in manuscript preparation. Responses are confidential and will not be shared with reviewers, area chairs, or senior chairs. The PC Chairs will analyze aggregated data to understand how emerging technologies influence the research publication process. *Please select all that apply below.*

LLM Experiment

By default, this paper will not be included in the LLM-assisted peer review experiment (<https://neurips.cc/Conferences/2026/ai-reviewing-experiment> (<https://neurips.cc/Conferences/2026/ai-reviewing-experiment>)). In that case, none of the co-authors of this paper will be eligible to participate as reviewer participants in the experiment. If selected (opt-in): This paper will be included in the experiment, and participating reviewers may use a custom LLM-assisted interface. If all authors of this paper opt in all papers they submit to this NeurIPS 2026 track, they may also be eligible to opt in separately as reviewer participants in the experiment.

- ☐ Opt in to include this paper in the LLM-assisted peer review experiment.

👁 Visible only to: NeurIPS 2026 Conference NeurIPS 2026 Conference Submission *number* Authors

Declaration *

- ☐ I confirm that the above information is accurate.

Ready For LLM Feedback

NeurIPS 2026 provides an optional early LLM-powered feedback on your submission via Google's Paper Assistant Tool, which is available only to authors for improving their manuscript. The feedback is not revealed to the reviewing body; see <https://blog.neurips.cc/2026/04/21/neurips-supports-authors-with-googles-paper-assistant-tool-pat/> (<https://blog.neurips.cc/2026/04/21/neurips-supports-authors-with-googles-paper-assistant-tool-pat/>) for more details. **Selecting this checkbox triggers the LLM feedback request and uses the single available feedback voucher for the submitting user. The program ends on the abstract deadline May 4th (Anywhere on Earth).** High demand may create processing delays, so we encourage authors not to wait until the deadline to request feedback.

- ☐ The submitted PDF is ready for LLM feedback.
